Feature #	Feature	Description	Feature type	Related to	Additional Info
1	tissue_ specificity	coefficient of variation of eGene's expression profile across EN-TEx samples (indivs. and tissues)	continuous	donor tissue	ratio between mean and standard deviation of gene expression profile
2	slope	GTEx v8 eQTL-eGene regression slope	continuous	donor tissue	-
3	tss_distance	GTEx v8 distance from eGene's TSS	continuous	donor tissue	-
4	ATAC	presence/absence of ATAC peak overlapping the SNV	binary	target tissue	set to 1 if peak present in \geq 1 indiv.
5	CTCF	presence/absence of CTCF peak overlapping the SNV	binary	target tissue	set to 1 if peak present in \geq 1 indiv.
6	DNase	presence/absence of DNase peak overlapping the SNV	binary	target tissue	set to 1 if peak present in \geq 1 indiv.
7	H3K27ac	presence/absence of H3K27ac peak overlapping the SNV	binary	target tissue	set to 1 if peak present in \geq 1 indiv.
8	H3K27me3	presence/absence of H3K27me3 peak overlapping the SNV	binary	target tissue	set to 1 if peak present in \geq 1 indiv.
9	H3K36me3	presence/absence of H3K36me3 peak overlapping the SNV	binary	target tissue	set to 1 if peak present in \geq 1 indiv.
10	H3K4me1	presence/absence of H3K4me1 peak overlapping the SNV	binary	target tissue	set to 1 if peak present in \geq 1 indiv.
11	H3K4me3	presence/absence of H3K4me3 peak overlapping the SNV	binary	target tissue	set to 1 if peak present in \geq 1 indiv.
12	H3K9me3	presence/absence of H3K9me3 peak overlapping the SNV	binary	target tissue	set to 1 if peak present in \geq 1 indiv.
13	POLR2A	presence/absence of POLR2A peak overlapping the SNV	binary	target tissue	set to 1 if peak present in \geq 1 indiv.
14	POLR2A phospho5	presence/absence of POLR2Aphospho5 peak overlapping the SNV	binary	target tissue	set to 1 if peak present in \geq 1 indiv.
15	EP300	presence/absence of EP300 peak overlapping the SNV	binary	target tissue	set to 1 if peak present in \geq 1 indiv.
16	sum	sum of features 4-15	discrete	target tissue	-
17	ATAC_k	fold-change ATAC signal $(\pm\ 5\ \text{bp}\ \text{window}\ \text{around}\ \text{the SNV})$	continuous	target tissue	mean value across indivs.
18	CTCF_k	fold-change CTCF signal $(\pm~5~{\rm bp}$ window around the SNV)	continuous	target tissue	mean value across indivs.
19	DNase_k	fold-change DNase signal $(\pm \ 5 \ \text{bp} \ \text{window} \ \text{around the SNV})$	continuous	target tissue	mean value across indivs.
20	H3K27ac₋k	fold-change H3K27ac signal $(\pm \ 5 \ \text{bp} \ \text{window} \ \text{around} \ \text{the SNV})$	continuous	target tissue	mean value across indivs.
21	H3K27me3_k	fold-change H3K27me3 signal $(\pm \ 5 \ \text{bp} \ \text{window} \ \text{around the SNV})$	continuous	target tissue	mean value across indivs.
22	H3K4me1_k	fold-change H3K4me1 signal $(\pm~5~{\rm bp}$ window around the SNV)	continuous	target tissue	mean value across indivs.

Feature #	Feature	Description	Feature type	Related to	Additional Info
23	H3K9me3_k	fold-change H3K9me3 signal $(\pm \ 5 \ \text{bp window around the SNV})$	continuous	target tissue	mean value across indivs.
24	POLR2A_k	fold-change POLR2A signal $(\pm \ 5 \ \text{bp window around the SNV})$	continuous	target tissue	mean value across indivs.
25	ATAC₋p	fraction of tissues with ATAC peak over SNV	continuous	28 EN-TEx tissues	-
26	CTCF_p	fraction of tissues with CTCF peak over SNV	continuous	28 EN-TEx tissues	-
27	DNase₋p	fraction of tissues with DNase peak over SNV	continuous	28 EN-TEx tissues	-
28	H3K27ac₋p	fraction of tissues with H3K27ac peak over SNV	continuous	28 EN-TEx tissues	-
29	H3K27me3_p	fraction of tissues with H3K27me3 peak over SNV	continuous	28 EN-TEx tissues	-
30	H3K36me3_p	fraction of tissues with H3K36me3 peak over SNV	continuous	28 EN-TEx tissues	-
31	H3K4me1_p	fraction of tissues with H3K4me1 peak over SNV	continuous	28 EN-TEx tissues	-
32	H3K4me3₋p	fraction of tissues with H3K4me3 peak over SNV	continuous	28 EN-TEx tissues	-
33	H3K9me3₋p	fraction of tissues with H3K9me3 peak over SNV	continuous	28 EN-TEx tissues	-
34	POLR2A₋p	fraction of tissues with POLR2A peak over SNV	continuous	28 EN-TEx tissues	-
35	POLR2A phosphoS5_p	fraction of tissues with POLR2AphosphoS5 peak over SNV	continuous	28 EN-TEx tissues	-
36	EP300_p	fraction of tissues with EP300 peak over SNV	continuous	28 EN-TEx tissues	-
37	is_proximal	whether the SNV overlaps any annotated TSS $(\pm \ 2 \ \text{kb})$	binary	-	set to 1 if SNV overlaps TSS wrt gencode v 24
38	is₋cCRE	whether the SNV overlaps any cCRE	binary	-	set to 1 if SNV overlaps cCRE wrt ENCODE3
39	is_out_repeat	whether the SNV overlaps any repeated region	binary	-	set to 1 if SNV does not overlap repeated region
